References — ChaCha20 Implementation in C

[1] Bernstein, D. J. — “ChaCha, a variant of Salsa20”

https://cr.yp.to/chacha/chacha-20080128.pdf

I used this as the core design reference for the quarter-round function and the 4x4 state matrix layout.

[2] Nir, Y. and Langley, A. — RFC 8439: “ChaCha20 and Poly1305 for IETF Protocols”

https://www.rfc-editor.org/rfc/rfc8439.html

I followed this for the exact byte layout, nonce/counter format, and I used its test vectors to verify my output.

[3] Bernstein, D. J. — Reference ChaCha implementations (public domain)

https://cr.yp.to/chacha.html

I checked my C code's behavior against this reference implementation.

[4] Claude (Anthropic)

https://claude.ai

I used Claude throughout to work through the algorithm and debug my C code.
